Med9, Low Level Laser Therapy LLLT, Cold Laser

Treats

Wound & Ulcer Repair
Scar reduction
Dermatology
Sports Medicine and Rehab
Pre & Post Operative Therapy
Sports Injury

We all want clear skin, however nature has a way of sabotaging us with frustrating imperfections.

Fortunately you no longer have to live with these imperfections. Marani has the most advanced technology, equipment and services to remove pigmented and vascular lesions and improve skin texture and tone. Skin rejuvenation is totally safe, non invasive and works to erase skin damage without disrupting the skin surface.

The Healing Power of Light ...

Human tissue can absorb and emit light, which can stimulate or modify metabolic processes. This phenomenon of bio luminescence induces important biological reactions. With this science we are able to repair, heal, restore and regenerate the body. This painless, safe, *non thermal* laser can reduce the inflammation and swelling of arthritis, muscular pain, orthopaedic and sports injuries. It can repair scars, stretchmarks and aid in skin and collagen regeneration. It can also improve the health of inflamed sensitive skin, acne, allergic reactions, eczema and psoriasis.

Integrative laser therapy improves blood and lymph circulation which is vital to the ongoing maintenance of the human body and the immune system.

Allow us to Turn Back the Clock As we age, cellular metabolism and circulation slows down and natural collagen production decreases. Skin cells take longer to regenerate and the damaging effects of free radicals take their toll. Ultimately, this is reflected in the outward appearance of our skin. Marani can help reverse this.

Multilase Integrative Therapy utilizes and supports this natural phenomenon with a series of highly specialized lasers that are incapable of causing damage to surrounding skin and tissues.

Multiple frequencies of light are delivered through the skin and tissues.

Multiple frequencies of light are delivered through the skin and converted by our cells into vital cellular energy (ATP), which is necessary for regeneration and repair of the human body without the thermal effects associated with cosmetic and surgical lasers.

Much of our information has been sourced from the Australian Institute of Laser Therapy
