## Skin Needling

**Benefits:** Skin needling is the ideal treatment for acne scarring. It also reduces fine lines, brightens dull skin, rejuvenates sun damaged and aging skin. It tightens and smoothes skin anywhere on the body and can be performed on all skin types and colours.

### What's involved:

A course of 3-5 treatments, each 30-60 minutes.

A medical grade needling pen creates millions of micropunctures in the skin. To heal these punctures, your skin increases its production of collagen and elastin which in turn improves your skin quality and texture. Numbing cream applied one hour before your procedure ensures your comfort.

**Downtime:** Immediate redness that disappears in 1-2 days. Makeup may usually be worn the next day.
